INDUSTRY NEWS - *News of potential interest to anyone working in the contract industry*

Raytheon Delivers WAAS GEO 6 Satellite Payload to FAA — Raytheon has handed over the Wide Area Augmentation System Geosynchronous Earth Orbiting 6 (WAAS GEO 6) satellite navigation payload. The new navigation payload has been delivered to the FAA, and is already operational. It replaces an older WAAS geostationary satellite, and will be used to increase the accuracy and reliability of GPS satellite signals, as well as offer coverage expansion. The Raytheon-developed WAAS is a navigation system operated by the FAA for civil aviation purposes. The navigation system meets all relevant air navigation performance and safety requirements. It includes space and ground equipment that helps detect any errors in the received GPS signals. The WAAS Master Stations generate a WAAS User Message that contains information to remove errors in the GPS satellite signals. The WAAS GEO 6 payload will join the FAA's two other existing WAAS satellite payloads operating in orbit.

Boeing's CST-100 Starliner Spacecraft Clears Pad Abort Test — Boeing has successfully conducted a pad abort test of its Crew Space Transportation (CST)-100 Starliner spacecraft, marking a critical milestone in the program. The test was conducted from Launch Complex 32 at the U.S. Army's White Sands Missile Range in New Mexico. It is part of NASA's Commercial Crew Program and designed to simulate a launch pad emergency. During the two-minute test, an uncrewed Starliner spacecraft lifted off from the test stand using its own power. Prior to lifting off, Starliner's four launch abort engines (LAEs) and multiple orbital maneuvering and attitude control (OMAC) thrusters fired up and generated 190,000 pounds of thrust to push the spacecraft up and away from the test stand. After take-off, it flew a mile above land in under 20 seconds and then deployed forward heat shield and parachutes. The spacecraft's crew module separated around 34 seconds into the test and used parachutes with landing airbags to touch down. The landing took place 95 seconds after the abort engines fired. The company claimed that Starliner successfully demonstrated the maneuver and performance of a range of integrated systems required to propel the capsule away from its Atlas V launch vehicle at any point before lift-off. Starliner's crew module will be recovered and returned to Launch Complex 32 for evaluation and analysis.

Hot Sheet of Available Contractors

Subscribers:

When you're unemployed or if you've received your layoff notice: let the recruiters know you're available with a free Hot Sheet listing. The Hot Sheet includes your job classification, name, contact information, and resume ID. The most effective use of the Hot Sheet is to make sure you have your updated resume as your listing includes a link to your resume. The Hot Sheet consists of two sections: Unemployed Listings and Mini-Ads. You have one free listing per calendar month, if you'd like additional listings during the same calendar month, you can place a Mini-Ad. The cost is \$5 per insertion. Mini-Ads are also for those who are currently employed, but would like to have a listing on the Hot Sheet. Deadline for inclusion on Friday's Hot Sheet is Thursday, 4:00 p.m. (Pacific Coast time).

Want more info on the Hot Sheet – call or email our office, better yet – login and click on the link "Sign up for this week's Hot Sheet!" for more info.

Recruiters:

Are you looking to fill an urgent requirement?? Why not try the Hot Sheet – it's a recruiting tool available to current advertisers. Recruiters can search the last 10 weeks of Hot Sheets to find contractors who are currently available. In addition to the Hot Sheet listing we provide you with a link to the subscriber's resume, along with their contact information. Login to search or view the latest Hot Sheet!!
